\$5,000

Timber Floorboard Terms and Conditions

- By selecting any of the timber floor boards upgrades, the purchaser accepts the following:
- Engineered timber flooring is a floor covering and has a limited life span;
 - Timber is a natural product that varies in colour and grain. It is not a hard surface and sharp or general objects will cause scratching or denting of the boards. Special care needs to be taken with entry, hallway and other high traffic areas that attract grit from the bottom of shoes as well as the placement of furniture or other fixed and loose items;
 - Engineered timber flooring is a natural material and is therefore susceptible to warping and movement. Timber naturally absorbs and releases moisture, hence alterations such as warping, shrinkage, expansion, twisting, etc will occur;
 - Anything that alters temperature or moisture such as heaters, air-conditioners, clothes dryers, fireplaces and direct sunlight can increase the occurrence of shrinkage or expansion of timber flooring. For all maintenance and climatic control requirements, refer to the manufacturer's Warranty & Maintenance Guide, which will be included in your owner's manual at settlement.

To seek to minimise shrinkage, expansion, delamination and fading of engineered timber flooring after settlement you should:

- Immediately install window furnishings and take other steps necessary to maintain a consistent temperature inside your property post-settlement.
- Maintain and clean the floor in accordance with the manufacturer's maintenance instructions.
- Avoid dragging items across the timber flooring, and or be very careful placing furniture and other fixed or moveable items on the flooring.

Please refer to the Engineered Timber Flooring Waiver annexed to the Customer Options Selection Form for further information

\$20,000

Technology Upgrades Terms and Conditions

By selecting technology upgrades above; the purchaser accepts the following:

- LED lighting in association with the lighting control system may demonstrate flickering (most notably at low lighting levels) during various times of the day. This is caused by a ripple effect in the authority power supply resulting in short term interference and is not due to a fault of the light fittings or associated hardware.
- Lighting control upgrades excludes the laundry lights, feature bathroom wall light and kitchen ceiling feature light above island bench.

Electric Vehicle Charging Terms and Conditions

- The Electric Vehicle Charging Upgrade will be provided to the number of car spaces as indicated on the Customer Options Schedule. If the Property includes more than one car space and the upgrade has been selected for some but not all of the car spaces then Mirvac will select the car space(s) that receives the upgrade at Mirvac's discretion.
- Electricity consumed by each car space will be connected to the power supply for the common property of the building, will be individually metered and will be charged to the purchaser on a user-pays basis. Refer to the strata by-laws for further details.
