

# ISLE

WATERFRONT NEWSTEAD

This masterplan was prepared as at May 2022 for the information of prospective purchasers only and is subject to change. Images contained within are indicative only and not intended to be a true representation of the finished development. Changes may be made to all aspects of the development including, without limitation, to the layout, composition, streetscape, dimensions, specifications, fittings and finishings) during development without notice. The masterplan is not to scale. Prospective purchasers should continue to make and rely on their own inquiries. Mirvac does not give any warranty or make any representations, expressed or implied in relation to the information in this masterplan (including without limitation its accuracy, reliability, completeness or suitability) and Mirvac does not accept any liability (including without limitation, liability in negligence) for any loss, damage or costs (including consequential damage) relating to any use of the information. Design options for 'Future Development Stage 3\*' and 'Future Development Lake\*' are indicative only and are subject to change based on factors such as market conditions and development approvals. Changes may be made to all aspects of the developments including, without limitation, to the layout, composition, streetscape, dimensions, massing, height and number of buildings during development without notice. These design options/schemes are not representative of the final design which is unknown at this time. The timing for these developments is unknown. The outline of these areas indicates the general outline of the developable footprint for the ground floor which is permitted by the relevant planning controls. Development may be permitted outside the ground floor footprint subject to receipt of development approval. Above the ground floor, development may, subject to receipt of planning approval, also extend beyond the footprint and extend over the area of future privately owned public open space. The outline of development depicted as 'Future Development Stage 3\*' is indicative only based on early design options/approvals. As at 17 June, 2022, the Newstead and Teneriffe Waterfront Neighbourhood Plan indicated that this area can be developed up to RL 55m (approx. 15 storeys) high as a "Code Assessable" Development Application. Mirvac has depicted the development at 25 levels (same as Quay and Isle), but may explore a range of development and height options for the site including options above or below 25 storeys. Any development application for a building over RL 55m (approx. 15 levels) will require an "Impact Assessable" Development Application. \*The areas noted as 'LIV Anura' and 'Quay' are, as at the date of preparation of this masterplan, under construction and due for completion in approximately 2024 (based on construction schedules current as at date of preparation of this masterplan but subject to change). # The dimensions of the perched lake shown in this plan reflect the perched lake's current dimensions. The owner of the lake (Brisbane City Council) is currently considering changes to the boundaries of this asset so these dimensions may change. Timing for this process is unknown. Version 2 – July 2022.
