Timber Floorboard Terms and Conditions

By selecting any of the timber floor boards upgrades, the purchaser accepts the following:

- Timber flooring is a floor covering and has a limited life span.
- Timber is a natural product that varies in colour and grain. It is not a hard surface and sharp or heavy objects will cause scratching or denting of the boards. Special care needs to be taken with entry and other high traffic areas that attract grit from the bottom of shoes as well as the placement of furniture.
- Timber flooring is a natural material and is therefore susceptible to warping and movement. Timber naturally absorbs and releases moisture, hence shrinkage or expansion will occur.
- Anything that alters temperature or moisture such as heaters, air-conditioners, clothes dryers, fireplaces and direct sunlight can increase the occurrence of shrinkage or expansion of timber flooring.

To minimise shrinkage, expansion, delamination and discolouration of timber flooring after settlement you should:

- Immediately draw your window furnishings and take other steps as necessary and keep a consistent temperature inside your property after settlement.
- Maintain and clean the floor in accordance with the manufacturer's maintenance instructions.
